

First open call - small-scale funded projects

No.	Company name	Country	Project title	Short Project Summary
1	A.D.A. srl	Italy	REcovery Substances Through Optimized REcycling	Develops new inhalation therapies with an emphasis on sustainable R&D by using green solvents and recovering active ingredients.
2	Synermont	Hungary	Recycled plastic eco-products	Provides manufacturing and outsourcing services, focusing on energy efficiency in recycled plastic production.
3	PROSERVATION GmbH	Germany	PROSERVATION – Sustainable cushion material production	Creates sustainable cushioning from plant residues to replace conventional materials like Styrofoam.
4	Italian Wind Technologies Srl	Italy	Circular business model for innovative wind blades	Develops wind turbines combining wind and solar energy, promoting a closed-loop recycling model for turbine materials.
5	tsenso GmbH	Germany	Temperature monitoring for food logistics as a service	Sells temperature tracking sensors for food supply chains, aiming to reduce electronic waste through reusable device models.
6	UALOH, SOCIEDAD LIMITADA	Spain	Atom	Focuses on sustainable furniture and modular structures using recycled plastic, aiming for international expansion and waste management.
7	EUC INOVAÇÃO PORTUGAL, UNIPessoal, LDA	Portugal	Circular Transformation in Digital Twin Deployment	Specializes in digital twins for various sectors, integrating circular economy principles to reduce energy use and waste.
8	INDRESMAT S.L.	Spain	Circularity feasibility study of the increase of recycled content within foamed bio-based polyurethane formulations from high energy efficient window frames and insulation	Develops biobased Polyurethane materials to improve energy efficiency in buildings and aims to increase recycled content.
9	Happy Innova SL	Spain	Circularity The Smart Lollipop	Creates innovative medical devices with a focus on reducing environmental impact through recyclable materials and circular models.
10	Komvida Kombucha S.L.	Spain	Integral valorization of SCOBY kombucha under a circular economy model	Produces kombucha and explores valorizing fermentation residues for sustainable bacterial cellulose production.
11	VOX terra, o.z., registrovaný sociálny podnik	Slovakia	Mushrooms as an answer to coffees and restaurants waste	Operates as a social enterprise in food and feed production, exploring circular business models using local waste as growing substrate.
12	Bram Kerkhofs Design Studio	Belgium	ConnectBlocks - Modular Building System	Develops system design methodologies for various sectors, focusing on modular, renewable materials and circular design principles.
13	DatenBerg GmbH	Germany	Rubber AI-Driven Recyclate Integration	Creates data solutions to support sustainable manufacturing, particularly integrating recycled materials in the rubber industry.
14	DeFood Sp. z o.o.	Poland	Trade digitalization of the quality rejections to improve the environmental impact and the profitability of fruits and vegetables sector	Works on a digital agriculture marketplace to connect wholesale trade and reduce waste in fruit and vegetable supply chains.
15	Alchim di Masante Roberto & C. sas	Italy	Toward a circular packaging for the egg industry: reuse and valorisation of egg shells by-products as a natural mineral filler for egg packaging.	Focuses on food-related innovation, developing biocomposite materials from waste like eggshell powder for sustainable packaging.
16	Felfil Srl	Italy	Felfil As a Service	Promotes ecological 3D printing by developing plastic recycling systems, transitioning from sales to operational rental models.
17	Sociedad Cooperativa Montevirgen	Spain	Reintegration of waste waters from the table olive industry, after active transformation into fertilizers.	Agricultural cooperative aiming to eliminate waste in olive processing by using residues for fertilizer production.

18	RESISTEX EXPLOITATION	France	Projet de reconditionnement de luminaires	Designs and sells quality lighting solutions with a focus on ecodesign and refurbishing discarded products.
19	Naranu Studio s.r.o.	Czech Republic	Airbō bags	Repurposes nylon from old car airbags into sustainable bags, optimizing production for circular economy principles.
20	Agree NET s.r.l.	Italy	Agreenet presents PiFresc: the freshness saving tag for fresh fruits and vegetables that combat food waste	Develops biopolymers to extend shelf life of fresh food and combat waste, exploring circular models in packaging.
21	BRAVE_OF	Spain	BRAVE_OF BY ESTHER CORTES	Dedicated to sustainable knitwear production by reusing unsold garments and installing recycling systems.
22	VISTA BALL	France	Repairing foot balls	Aims to repair and extend the life of sports balls to reduce waste in sports equipment.
23	MR MEDIA Oy Ab	Finland	Recycling and remanufacturing of industrial pipeline parts	Develops a platform for recycling and remanufacturing process system parts, promoting sustainability in manufacturing.
24	toern GmbH	Germany	Market entry validation for more sustainable and circular returns in home and living - toern GmbH	Provides a SaaS solution to make returns more circular in e-commerce, focusing on forwarding items to other customers.
25	Ruralis.com	Italy	Rethinking Utilization: Revitalizing Accommodations with Local and Innovative Sustainability	Manages accommodations in rural areas, aiming to enhance sustainability and create circular tourism models.
26	Alhomna Systems	France	Solar Focus: Sustainable Waste Transformation - Turning Waste into Wealth with Zero Emissions	Leverages solar energy to convert plastic waste and biomass into renewable energy, addressing sustainability challenges.
27	Solutions Durables	France	Reusing hotel fabrics	Recycles luxury fabrics and leather scraps from various sources into upcycled products, enhancing local production.
28	MOZEK s.r.o.	Czech Republic	Recycling Line Photovoltaic Panels	Builds a recycling machine for photovoltaic panels, aiming to improve recycling efficiency and material reuse.
29	ECAST d.o.o.	Slovenia	Sustainable fish egg incubator feasibility study	Researches eco-friendly fishing equipment, developing solutions like a biodegradable fish egg incubator to reduce plastic waste.
30	AZUVIA	France	Insane Festival REUT	Designs wastewater treatment technologies, planning to expand into modular units for festivals and large events.
31	Biottonia Naturalcare S.L.	Spain	Valorisation process of fractions obtained from green residues for energy storage application	Manufactures products from aromatic plant waste, exploring technological solutions to reduce waste and create value-added products.
32	Michael Odintsov Vaintrub farm	Italy	Poultry Ecosystem Optimization for Nut Cultivation	Operates a bio-certified hazelnut farm using innovative methods like pastured poultry to manage soil and support regenerative practices.
